

Certification in College Teaching Institute, May 9-10, 2019, Michigan State University

Worksheet for Reflections and Applications of Teaching and Learning

Session: Incorporating Technology in Teaching Thursday

What skills and techniques did I learn that will help me become a better educator?

- Many "tools" that are thought to be "useless" in a classroom setting can be used creatively and effectively. One must not overlook these tools.
- Technology can enable examples and exploration not possible in the classroom. Seeing these opportunities can greatly enrich a course.

What things am I still uncertain about regarding this topic that I need to investigate further in the future?

- Technology opens the door to many new experiences, but also to unexpected results/events. How to best prepare for and avoid "disastrous" outcomes?

How can I apply materials from this session to my own class to enhance the effectiveness of teaching and learning?

- I must keep my eyes open and be ~~or~~ willing to try new technologies in ways that enrich learning
- I must use discernment when choosing technologies in the classroom.
